BOUITA **Yassir**

Junior IoT Engineer · 1st M.Sc. Student @INSEA RABAT
Rue Al Amir Abdelkadder, Agdal, Rabat, Maroc
(+212) 777373776 | Bouita203@gmail.com | bouita-yassir-portfolio.vercel.app | YassirB808 | yassir-bouita-50173828a

Profile

Computer Science and Intelligent Systems Master's student at INSEA with a multidisciplinary background in electronics, cybersecurity, and robotics. Passionate about data-driven technologies, I offer strong skills in system design, smart connected solutions, and data analysis. Currently seeking an end-of-year internship to contribute to innovative projects.

Education

National Institute of Statistics and Applied Economics (INSEA) — *Rabat, Morocco*
Master's in IoT and Big Data — *2025 – Ongoing*
— Focused on computer science and intelligent systems, with expertise in data-driven technologies and connected systems.

National Institute of Posts and Telecommunications (INPT) — *Rabat, Morocco*
1st Year Master's in IoT and Big Data — *2024 – 2025*
— Specialized in IoT, Big Data, and Cloud, with strong expertise in data engineering and privacy analytics.

Faculty of Sciences of Rabat (FSR) — *Rabat, Morocco*
B.Sc. in Electronics, IT, and Robotics — *2021 – 2024*
— Embedded systems, Arduino, and sensor electronics with experience in circuit simulation via Crocodile.
— Proficiency in full-stack development and design tools, including MySQL and 3D modeling (CATIA, SolidWorks).

Professional Experience

Digital Data Service — *Rabat, Morocco*
Frontend and UI Design Intern — *August 2025 – September 2025*
- Developed the frontend architecture for Archix-Base using React, prioritizing scalability and performance.
- Built the application dashboard, including complex navigation, secure authentication, and document management systems.
- Implemented a design system to ensure a consistent, responsive, and high-quality user experience across the platform.

Projects

NeuroscanAI – Brain Tumor Detection with YOLOv8n
Tech Stack : FastAPI, YOLOv8, OpenCV, NumPy, Pandas, Flask, Jupyter, Chart.js, Git.
— Developed a medical web application using YOLOv8n for automated tumor detection in MRI scans.
— Built an intuitive interface providing radiologists with real-time diagnostic predictions at 81% accuracy.

Mindspark – Multiplayer Trivia Game via Django
Technologies : Django, WebSocket, Channels, HTML/CSS, Bootstrap, JavaScript, SQLite.
— Created a real-time multiplayer trivia game using Django and WebSockets for seamless competitive gameplay.
— Developed a responsive frontend using HTML, CSS, and Bootstrap to ensure an optimal cross-platform user experience.

Skills

Programming Languages	Python, C, Java, JavaScript, MATLAB, R, TypeScript
Machine Learning & AI	PyTorch, Scikit-learn, TensorFlow, CNN, YOLO (Ultralytics YOLOv8)
Web Development	Flask, Django, Streamlit, React.js, Angular, HTML, CSS, PHP, Bootstrap, WebSocket, Tailwind
Big Data & Cloud	Apache, Hadoop, Cloudera, Google Cloud
Databases	MySQL, PostgreSQL, SQLite, MongoDB, Redis, Oracle (SQL, PL/SQL), DB Administration
Electronics & Embedded	Arduino, SolidWorks, Catia V5, PCB Design, Soldering
Data Engineering & BI	ETL, Talend, Power BI, Tableu, Web Scraping
Tools & Documentation	Git, GitHub, Office365, LaTeX (Overleaf), Notion

Languages

Arabic (Native) | **French** (Fluent) | **English** (Fluent)
ASL (Beginner) | **Spanish** (Beginner)
